

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

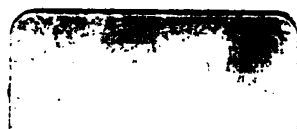

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

LOCATING TOWNS.

All maps are indexed by letters and numbers on margins. After the name of each city and town is a reference letter and number, in parenthesis, referring to its location on the map.

POPULATION

The population figures and statistics on map pages in this issue of the Directory were obtained from bulletins of the Department of Commerce and Labor covering the thirteenth Census of the United States.

CHARLES H. FULLER COMPANY

EXPLANATION OF FIGURES IN THE THIRD COLUME OF EACH PAGE

The first figure indicates the number of columns to the page.

The second figure indicates the type width of each column expressed in pica ems.

The third figure indicates the number of agate lines in each column.

For example—7-13-294, means the publication contains 7 columns to the page, and the type measurement of the column is 13 pica ems in width and 294 agate lines in length.

All type sizes are correctly expressed on the basis of the present point system. The technical measurement of a point is .01384 of an inch, and 72.254 points are equal to one inch. The pica em is the practical basis used by printers to express type measurements. A pica em is equal to 12 points, or .16608 of an inch.

The following table shows the practical equivalent measurements of column widths expressed in inches:

12 ems = 2 inches	16½ ems = 2¾ inches
12½ ems = 2⅙ inches	17 ems = 2⅞ inches
13 ems = 2⅓ inches	18 ems = 3 inches
13½ ems = 2¼ inches	19½ ems = 3¼ inches
14 ems = 2⅔ inches	21 ems = 3½ inches
15 ems = 2½ inches	22½ ems = 3¾ inches
16 ems = 2⅔ inches	25½ ems = 4¼ inches

CIRCULATION DEFINED

GROSS CIRCULATION is the number of complete copies printed after deducting from press count all spoiled copies.

NET CIRCULATION is the number of complete copies actually distributed after deducting from the press count, all spoiled and unused copies; returns from all sources or credits allowed to newsboys, newsdealers and agents for unsold papers; all copies sent to advertisers and advertising agents, exchanges; all copies used for samples and all copies used for files or other office purposes excepting copies to correspondents, employees, conductors, motormen, baggagemen, policemen, firemen, or other persons for service.

The circulation figures in this edition were obtained on specially prepared blanks and have been divided into Three General Classes, indicated by special marks prefixed to circulation figures and explained below.

All statements supported by affidavit are indicated by bold face type.

“\$”—This mark indicates a rating based on publisher's report to the Post Office Department, Oct. 1, 1914. This report is required by the Federal Government from daily newspapers only. By Act of Congress dated Aug. 24, 1912—See page 5.

“*”—This mark indicates a statement of average gross circulation as defined above.

“©”—This mark indicates a statement of average net circulation as defined above.

“—”—This mark indicates that although repeated requests were addressed to the publication for circulation information no reply was received or that the publication refused to supply us with information covering the definite period on which circulation ratings in this book are based (April 1, 1914, to Sep. 30, 1914), or for reasons best known to himself the publisher does not wish his circulation quoted.

Each publication assigned a circulation rating in this Directory has furnished a circulation statement purporting to cover the definite period April 1, 1914, to Sep. 30, 1914, unless otherwise noted, and each rating is determined by the average circulation per issue for that period.

This Company will not assume any responsibility as regards the circulation ratings quoted in this Directory, except those publications which have our circulation guarantee as indicated by this ■ character.

CHARLES H. FULLER COMPANY.

KEY TO ADVERTISING RATES

All Rates Are Quoted per Inch Unless Otherwise Stated.

In this edition we have listed the advertising rates according to publisher's printed rate cards. The limited space allotted to this feature permits us to quote only the maximum rate, which is for one inch, single column space, for one insertion, and the minimum rate, generally determined by the total number of inches, to be used as desired by any one advertiser within a period of one year. Some publications quote lower rates for advertisements of a regular size, to be run according to a fixed schedule of insertions determined in advance, and generally to be continued for a period of one full year; while many of these same publications charge a slightly higher rate to give advertisers the privilege of ordering variable space used on an irregular schedule of insertions during the year.

As most advertisers now run their advertisements on the open-space plan, please note that the rates herein quoted are on that basis, excepting a limited number of publications for which the rate cards did not indicate the rates for the total amount of open space within one year, or where we consider it advisable to give the price for an advertisement of a definite size for a definite number of insertions. We do not, in any sense, guarantee the rates quoted in this directory, for the reason, principally, that publishers generally do not undertake to guarantee their rates to be in effect for any definite period. We anticipate, however, that this feature of our Directory will be of considerable service to a large number of advertisers for practical reference, and to determine approximately the cost of any tentative advertising campaign they formulate in advance of a definite estimate prepared by a competent agency. For ready reference, we have arranged the following key to explain the letters set opposite the minimum rates quoted in the second column on each page, to indicate the total number of inches, or equivalent in agate lines, which must be used within one year. Fourteen agate lines equal one inch in advertising measurements. Rates quoted herein do not cover the extra charge made by some publications for composition on ads to be set.

F means a flat rate. No discount being allowed for volume of space or total number of insertions used. ,

A—	71¾	inches equal to	1,000	agate lines

CHARLES H. FULLER COMPANY.

CHARLES H. FULLER COMPANY'S CIRCULATION GUARANTEE

In this edition we have continued the plan whereby we guarantee the truthfulness of some publisher's circulation statements as printed herein.

Each guaranteed rating is designated by this character (G) and an announcement of the guarantee following the listing of the publication.

There is an evident tendency among an increasing number of publishers to give an absolute circulation guarantee on which their current advertising rates are based. Our only charge to publishers for this circulation guarantee is the nominal cost of the announcement.

This circulation guarantee is another step in the line of progress to maintain the position of this Directory as *the leading authority*, because it contains the most authentic circulation statistics that can possibly be secured from publications listed herein, and to make each annual edition more valuable for the use of intelligent and progressive advertisers.

This guarantee in this edition will be in effect only until January 1, 1916, after which the forfeit we offer will be withdrawn. This time limit should give every advertiser the fullest opportunity to challenge any circulation statement we have guaranteed. However, we have every reason to believe that the publishers who have availed themselves of our guarantee will be willing to allow the advertisers to audit their records and books at any time.

If any advertiser intends to challenge our guarantee on any publication, he must first notify us and we will then supply further details of procedure.

CHARLES H. FULLER COMPANY.

EXTRACTS FROM THE POSTAL LAWS AND REGULATIONS.

Sec. 443. It shall be the duty of the editor, publisher, business manager, or owner of every newspaper, magazine, periodical, or other publication to file with the Postmaster General and the postmaster at the office at which said publication is entered, not later than the first day of April and the first day of October of each year, on blanks furnished by the Post Office Department, a sworn statement setting forth the names and post-office addresses of the editor and managing editor, publisher, business managers, and owners, and, in addition, the stockholders, if the publication be owned by a corporation; and also the names of known bondholders, mortgagees, or other security holders; and also, in the case of daily newspapers, there shall be included in such statement the average of the number of copies of each issue of such publication sold or distributed to paid subscribers during the preceding six months: *Provided*, That the provisions of this paragraph shall not apply to religious, fraternal, temperance, and scientific, or other similar publications: *Provided further*, That it shall not be necessary to include in such statement the names of persons owning less than one per centum of the total amount of stock, bonds, mortgages, or other securities. A copy of such sworn statement shall be published in the second issue of such newspaper, magazine, or other publication printed next after the filing of such statement. Any such publication shall be denied the privileges of the mail if it shall fail to comply with the provisions of this paragraph within ten days after notice by registered letter of such failure. (Act of August 24, 1912.)

2. All editorial or other reading matter published in any such newspaper, magazine, or periodical for the publication of which money or other valuable consideration is paid, accepted, or promised shall be plainly marked "advertisement." Any editor or publisher printing editorial or other reading matter for which compensation is paid, accepted, or promised without so marking the same, shall upon conviction in any court having jurisdiction, be fined not less than fifty dollars (\$50) nor more than five hundred dollars (\$500). (Act of August 24, 1912.)

3. The statement required by this section shall be made in duplicate, on Form 3526, and both copies delivered to the postmaster at the office of entry of the publication. The postmaster shall forward one copy to the Third Assistant Postmaster General, Division of Classification, and retain the other in the files of the post office. To enable publishers to file such statement promptly, postmasters shall furnish them copies of Form 3526 at least ten days prior to the first day of April and of October of each year.

4. Postmasters shall obtain for the files of their offices a copy of the issue of each publication at their respective offices, in which the required sworn statement is published.

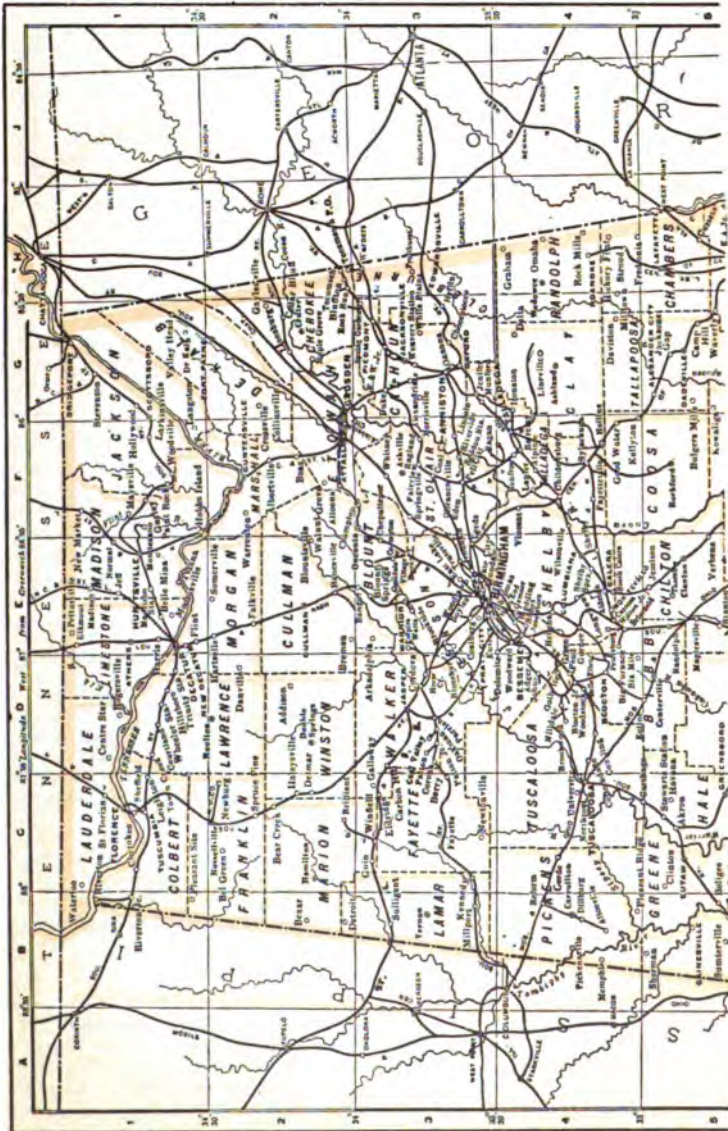

5. Postmasters shall give prompt and careful attention to the making and filing by publishers of the statements required by this section, and promptly report to the Third Assistant Postmaster General the failure of any publisher to file such statement, or to publish it in the second issue of the publication printed next after it has been filed, but in no case shall a publication be denied the privileges of the mail except upon departmental instructions.

6. Where exemption is claimed from compliance with the provisions of this section, the postmaster shall request from the publisher a statement showing the ground on which such exemption is claimed and forward it to the Third Assistant Postmaster General, Division of Classification, together with a copy of the publication.

Sec. 428. Whoever shall knowingly submit or cause to be submitted to any postmaster or to the Post Office Department or any officer of the postal service, any false evidence relative to any publication for the purpose of securing the admission thereof at the second-class rate, for transportation in the mails, shall be fined not more than five hundred dollars. (Act of March 4, 1909.)

† Foreign advertisers find Oakland a profitable field. Why? Because—				
It is the fastest growing community on the Pacific Coast, has over 885,000 people within a five-cent car fare limit. Its water carried commerce is over four million tons yearly, valued at over \$200,000,000. Its railroad traffic exceeds 4,500,000 tons yearly. It has 1,400 factories, whose annual output exceeds \$80,000,000, and its investment in industrial plants more than \$70,000,000. It has spent \$50,000,000 during the past six years in the construction of permanent buildings. Its assessed valuation on a one-half basis is over \$200,000,000. Its leading newspaper is the ENQUIRER.

† The Globe maintains its popularity in the local field by giving the readers an up-to-the-minute news service, features for every member of the family and an impartial presentation of local and state happenings. No premiums are used to build circulation, but its growth is steady. Circulation, 60 per cent city, 40 per cent suburban. In combination with a daily, it thoroughly covers the local field.				

* Government statement—See page 5. * Gross circulation. © Net circulation. ☐ Can use matrices. † Publisher's paid announcement. These marks, key to rates and meaning of figures in third column are explained on pages 2 and 3. Sworn circulation statements in bold face type. Each rating is the average circulation for six months ending September 30, 1914, unless otherwise noted.

{ Sonntagspost (Ger)□..Ind..Su Morn.....	© 23,906	2.10	1.12 L	7-13 -300
† The Abendpost has the largest paid circulation of all German daily newspapers west of New York City, and reaches almost every German family in Chicago and vicinity.				
The Abendpost is the only Chicago daily printed in a foreign language which is a member of the Audit Bureau of Circulations. The circulation of the Abendpost is practically not duplicated, and does not depend upon street sales, but goes right to the homes of its subscribers. No advertiser can fully cover Chicago and its suburbs without the Abendpost.

† The net paid circulation of the Journal-Gazette averages over 25,000. Ft. Wayne and vicinity can be covered by using the Journal-Gazette exclusively.

It is Ft. Wayne's home newspaper, carrying 50 per cent more local business and more classified advertising than all other papers in Ft. Wayne combined.

John M. Branham Co., Publishers' Representatives.

† In Davenport, Iowa, it's the Democrat and Leader.

Advertisers are now guaranteed more than twenty-four thousand circulation daily, making this a part of your contract. Up to the minute in news, always reliable, the standing of the Democrat and Leader in Davenport, Iowa, is unquestioned. Special co-operation in the interests of advertisers and its selling force is proven by last year's record, showing that ten per cent more advertising was carried in the Democrat and Leader than its nearest competitor.

† Des Moines Sunday Times has received a cordial welcome from the people of Prosperous Iowa—"The Land of Milk and Honey"—and it goes to those who not only want, but are able to purchase the best the market affords. The fact that our subscribers write letters to the editor regarding the various news and editorial features, while their wives send in for patterns and information regarding fashions, shows that we have "The Greatest Home Newspaper of Iowa." We guarantee that our average Sunday circulation in 1915 will be 10,000 copies. Circulation proved by post office receipts.

4-13½-189

†The American Woman reaches only actual mail order prospects. They are for the home circle, read by people living outside the large cities who depend upon buying by mail to supply their wants. The reading matter they contain makes each number carefully and closely read by every member of the family.

Every copy goes to a live subscriber.

Comfort..Lit & Family..M.....***1,260,913**
Min. rate 1 p. 1 tl. \$2,544.00.

70.00

4-14½-212

☐ This circulation rating of Comfort, Augusta, Maine, showing the average number of complete copies mailed per issue as proven by Post Office receipts, is hereby guaranteed by the Charles H. Fuller Company in the sum of \$1,000, which will be paid to the first advertiser who successfully controverts its accuracy. Permission to audit explained on page 4.

Those qualities which have placed Comfort at the head of the mail-order monthlies, make it equally effective as a medium for general publicity and store-sales advertising. Its high-quality rural circulation and its strong hold on the confidence of its subscribers are factors of great value to advertisers who are endeavoring to reach and impress the thrifty people in the small towns, and the prosperous, progressive farmers and their wives and families throughout the richest agricultural sections of the Union.

Comfort has the largest and best rural circulation of any one publication in the world.

Eagerly read by every member of the family in more than a million and a quarter homes.

†Before planning an elaborate mail order campaign it will pay you to try out your copy in these papers.

Because the Vickery & Hill publications reach only actual mail order prospects—prosperous small town and country families who find it more advantageous to buy by mail—the oldest and most successful mail order advertisers consider them the standard by which to measure the cash results that a given amount spent for mail order advertising should produce.

† The Union is the leading advertising medium in Springfield—a prosperous city of over 100,000, with a trading population of more than 350,000 people. During past year The Morning Union (independent of evening edition) carried 1,114,566 more square lines of advertising than any paper in its field. Sworn statements of publishers to Postoffice Department show The Union has nearly as much paid circulation as its morning and evening contemporaries combined and 81.8-10% more than its nearest contemporary. Send for 32-page booklet entitled, "Where Every Copy of The Union goes."

¶ The Daily, Sunday and Semi-Weekly Amerika exert a powerful influence among the German Democrats and the best class of Germans in St. Louis.

The Amerika is also the only acknowledged daily organ of the German Catholics of the city, comprising over 25,000 families, bringing direct all the news pertaining to 23 parishes and their numerous affiliated societies.

The Amerika has a field of readers covered by no other paper in St. Louis, since the majority of its readers are German Catholics.

Star □..Ind..Eve ex Su.....© 61,882	1.40	1.12 C	7-13 -305
‡ The Daily Star reaches thousands of readers who see no other St. Louis afternoon daily.			
Government statement October, 1914, 61,882. An advertising gain of 1,183 columns during 1914 over 1913 records.			
The re-organization of The Star places it among the foremost metropolitan dailies.			
John M. Branham Co., Publishers' Representatives. Chicago and New York.			

Times □..Ind..Eve ex Su.....© 84,040	3.50	1.68 L	7-13 -300
‡ The circulation of the St. Louis Times is almost all home delivered. It reaches the homes of standing and purchasing power. City circulation alone over 70,000. Total considerably greater. Paul Block, Inc., New York, Chicago, Boston, Detroit.			

Westliche Post (Ger)..Rep..Morn ex Su....\$ 22,922	2.10	1.12 G	7-13 -300
Mississippi Blaetter (Ger)..Rep..Su Morn...\$ 24,002	2.80	1.40 G	7-13 -300

‡ The latest census shows that 90,329 citizens of St. Louis
were born in Germany.

These and their families and the members born here, mak-
ing about 45% of the population, loving the German language,
is our field.

The rich counties surrounding St. Louis are very strong in
Germans; in most the Germans are most numerous.

Today our papers are conceded to be the best published
in the German language in this country.

That is why our circulation is maintained, and is increas-
ing; likewise our advertising.

German language papers everywhere are now being read with
increased interest; and now is the best time to use them.

Deutsche Amerikanischer Farmer (Ger)☐...Agrl..Wed	© 123,984	4.90	4.90 F	4-13 -194
--	-----------	------	--------	-----------

† Circulation of Deutsch-Amerikanischer Farmer for full year ending December, 1914—133,869 average weekly.

The Deutsch-Amerikanischer Farmer is the foremost German farm paper, the paper to use to reach the prosperous German farmers. Special consideration in the way of position given to large ads.

Full page ads placed on last outside page at regular rates if booked early, and with color work when convenient.

Freie Presse (Ger)☐...Ind..Wed.....	© 129,033	4.90	4.90 F	7-13 -275
-------------------------------------	-----------	------	--------	-----------

† Circulation of Freie Presse for full year ending December, 1914—133,992 average weekly.

The Lincoln Freie Presse has the largest circulation of any German paper in America. All subscriptions strictly paid in advance. Circulation in all States of the Union, but principally in the Middle West.

Is not the tail end of a daily—contains no plate matter, but every line specially prepared and interesting to Germans.

ALBANY, N. Y.—A One-Paper City

THE ONE NEWSPAPER

THE TIMES-UNION

Ask Advertisers Who Use Our Columns Exclusively

Albany might well be called "The gateway of the West." At the head of Navigation on the Hudson River and the New Barge Canal Terminal, it has many unusual distinctions for a city of 100,000 population.

Its public school system of 26 buildings with 12,000 pupils and 353 principals; the New High School costing \$800,000, with 1,650 scholars and 57 professors; the New State Normal College opposite the High School, an imposing structure costing \$355,000, with 710 scholars and 55 professors, are unsurpassed for the excellence of instruction.

In addition there are 26 private schools having 371 principals and 6,000 students.

Besides these institutions there are several departments of Union University, Albany Medical College, Albany Law School, Albany College of Pharmacy, Dudley Observatory, Bender Hygienic Laboratory.

The State Educational building, one of the finest structures of its kind in the world, costing \$5,000,000, has accommodations for 2,000,000 volumes. Through this library the learning of all ages is available. No institution in the country affords better opportunities for reading on any subject desired. In addition to this, there are 12 libraries containing over 525,000 books.

Albany has 4 banks of discount and 2 Trust Companies clearing \$320,000,000 in 1914, and 7 Savings Banks with 114,448 open accounts and \$80,000,000 on Deposit.

Three hundred passenger and 300 freight trains pass through Albany daily. It is the second largest Express, and the third largest Mail Transfer Station in the United States.

The Largest and Finest steamers (on inland waters) in the world run between Albany and New York on the famous Hudson River.

The Albany Commercial Co., composed of 200 of the principal business men of Albany, have just completed a \$200,000 manufacturing building, to promote the industrial welfare of the city by giving to manufactures the best facilities which could be supplied by a modern factory building, arranged for either small or large manufacturing.

In this rich thriving City of 100,000 people 26,000 Times-Unions are delivered every evening to paid-in-advance subscribers, and 16,000 in the suburban towns.

THE PROMOTION DEPARTMENT OF THE TIMES-UNION IS AT YOUR SERVICE

¶ The most interesting fact in Buffalo for advertisers is the rapid, steady growth of the Buffalo Enquirer, the evening paper published by W. J. Conners, owner of The Courier. The circulation of the Enquirer is now over 60,000. Double what it was three years ago. The average circulation for year 1914 was as follows: Evening Enquirer, 60,106; Daily Morning Courier, 67,181; Sunday Courier, 99,241. This gives a daily combination for Courier and Enquirer of 127,237, which makes it the best proposition in city.

¶ Seven day newspapers in Buffalo during 1914 were The Times, News, Courier and Express.

The Buffalo Times carries more paid display advertising, more department store advertising, more automobile advertising than any other seven day Buffalo newspaper.

Every local advertiser uses The Times.

They are on the ground and know their business.

The Illustrated Sunday Magazine.

The Illustrated Sunday Magazine circulates nearly 1,300,000 copies each week with sixteen metropolitan Sunday newspapers. This tremendous circulation is concentrated in definite territory—in and around 16 distributing centers. The territory is the best buying territory in America.

The National Magazines and Weeklies circulate throughout the whole country, and are logical mediums for a National campaign, but alone they do not solve the problem for the big distributing centers. These deserve individual treatment.

The Illustrated Sunday Magazine takes care of 16 of these distributing centers, giving as much circulation in and around these centers as could be given by a magazine with 7,000,000 circulation.

The Illustrated Sunday Magazine is a real Weekly Magazine. It has all the features of a National Magazine. The fiction—short stories and continued stories—is a strong feature of the magazine, and the best known authors in the country contribute regularly. Rex Beach, Sir Gilbert Parker, George Randolph Chester, Jack London, Gouverneur Morris, F. Hopkinson Smith, Robt. W. Chambers and George Barr McCutcheon, and such artists as Harrison Fisher, J. Montgomery Flagg, May Wilson Preston, Hamilton King, etc., are featured regularly.

Its magazine quality and standard are a guaranty that the publication is retained in the home for many weeks, and advertisers invariably report returns over a period of many weeks.

THE LIST.

1,300,000 Circulation.

Published Co-operatively by and as a Part of the Sunday Edition of the

Pittsburgh Gazette-Times	Philadelphia Record
Minneapolis Tribune	Boston Herald
Rochester Democrat & Chronicle	Detroit Free Press
Memphis Commercial-Appeal	Milwaukee Sentinel
Louisville Courier-Journal	Des Moines Register and Leader
Omaha World-Herald	Dayton News
Columbus Dispatch	Providence Tribune
Buffalo Times	Worcester Telegram

Each paper on the list is a dominant factor in its local field, and inasmuch as the Sunday Magazine is identified with the local newspaper in each city, it exerts a very definite trade influence.

The dealer who is your local representative, and who is closer to the buying public of his territory (which is a part of your territory) than you can possibly be, may read and know of but a few magazines, but his local newspaper is a part of his everyday life, and he knows that when you are advertising in the Sunday Magazine distributed with an influential newspaper, that four-fifths of the possible customers of his store will read that advertisement.

He further realizes that the readers of your advertisement may go to his neighbor's store to make the purchase. So to divert them to his store in many cases he makes window display of your goods, instructs his clerks to push your goods during the week following your advertising, and in many instances advertises over his name, and at his own expense, that he handles the products advertised in the Illustrated Sunday Magazine.

We have a co-operative plan which has produced very remarkable results for several National advertisers. We have tangible proofs of the results and are always glad to give details of the plan and to show the evidence.

† The Jewish Daily News, the American daily printed in Yiddish, "the First and Foremost Jewish daily in the world." Distinctly a home paper. Established 1885. Its subscribers of long and permanent standing. The organ of the best element of thrifty Americanized Jews, who read it carefully, because it not only covers the news of the day but contains matters of special interest to them as Jews, and which they can find in no other paper. Daily English Department. Correspondents in every news center in America, Europe and Asia. On request an interesting booklet regarding the Jews of America and The Jewish Daily News will be sent.				
Jewish Morning Journal (Yiddish)□..Ind				
Morn ex Sat.....	110,520	2.10	1.40 D	7-12½-294
Su Morn		2.10	1.40 D	7-12½-294
† Noteworthy facts about the Jewish Morning Journal: 1. The only Jewish paper in the New York morning field. 2. Net paid circulation in New York City larger than that of any other Jewish paper. 3. Prints more "help wanted" ads than any English paper in New York, excepting the "World." 4. Reaches the more intelligent class of readers, who recognize its merits as a higher class newspaper. Largest German Market in America

NEW YORK leads all the cities of the United States in German population, and the New York Staats-Zeitung leads all German language newspapers in America in circulation, prestige and advertising.

The basis of this leadership is the entire confidence of the German-reading public, the superior news and editorial service of the Staats-Zeitung, and its sympathy with and understanding of German problems.

From this it is comparatively easy to understand why the Staats-Zeitung publishes nearly 5,000,000 lines of paid advertising annually. This is as much as that published by all the other German newspapers of New York combined.

To overlook the Staats-Zeitung is possible only when an advertiser fails to realize the scope of its influence in the market of New York.

† The Illustrated Companion, established 30 years, circulates 300,000 copies monthly to pleased subscribers in small towns and rural districts of U. S.—furnishing entertainment and instruction to all members of families who shop mostly by mail. It closely guards its advertising pages and thus protects its readers. Its columns may be used with confidence to sell every legitimate requirement for the Family, Home or Farm. For wearing apparel, personal adornment or home equipment it has no equal, as shown by its pages. Every advertisement has position. Equal chances for all. Forms close 17th of preceding month. Be sure it's on your list.

Needlecraft..Fashions & Needlework..M	42.00		4-12½-189
Min. rate 1 p. 1 ti. \$1,687.60 insertion.			
† Needlecraft deserves the closest consideration of every advertiser—direct or publicity—seeking to influence the women buyers of the best class in small towns. Every copy goes directly into the homes of housewives who subscribe for Needlecraft because of the superiority and practicability of its needlework, fashion and home decorative service. Its subscribers buy it solely for this service, no premium inducements or clubbing offers being made. Needlecraft's circulation is 750,000 (net paid in advance) and contracts are made on this basis. † The World's Advance is a consolidation of Popular Electricity & The World's Advance, of Chicago; Modern Electricity & Mechanics, of New York, and Electrician & Mechanic, of Boston. The Magazine is profusely illustrated and describes in simple language the world's advance in electricity, mechanics, science, invention.			
It is one of the few publications in 1914 which showed a successive advertising gain each month over same period of previous year and carries a larger percentage of keyed advertising than any publication of its kind. 72% of its readers are over 21 years old and is exclusively a man's publication without waste circulation among women and children. Further data on request.

¶ Cleveland is the sixth largest city in the United States. Including its suburbs, it has a population of over 700,000. According to the United States Census, Cleveland is 75 per cent foreign. A majority of this large foreign element are German speaking people. The Wachter und Anzeiger is the only German Daily and Sunday newspaper published in Cleveland. It carries the advertising of the most prominent Cleveland merchants.

THE MARKET THAT'S IN PHILADELPHIA

Philadelphia is essentially a city of homes and it is a city that does not end with the city limits, but extends out into the country for a radius of twenty-five miles in every direction, and this district is known as the Philadelphia buying radius.

In this territory there is a population of over two and a half million, or, approximately five hundred thousand individual homes, of which forty per cent are owned, or are being bought by those who live in them. In no other city are there as many Building and Loan Associations as are to be found in the Philadelphia territory, there being over eight hundred separate organizations in Philadelphia alone, having approximately three-quarters of a million stockholders.

Perhaps because of this condition, statistics show that there are children in the majority of these homes, there being over two hundred and fifty thousand children of school age and nearly twice as many under the age of six years in this territory.

These families do not belong to the farming class, but are connected with the various manufacturing and other industries in and around Philadelphia, the majority of them, as is evidenced by the character of the homes, particularly in the suburbs, have comfortable incomes ranging from fifteen hundred dollars a year upward.

In addition to Building and Loan Societies, which act as saving funds and investments for those with smaller incomes, there are in Philadelphia thirty-four banks whose total deposits are close to two hundred million dollars.

Philadelphia leads the world in the manufacture of carpets and rugs, with a yearly output worth \$25,000,000 and employing 16,500 persons in 150 mills.

There are ninety-three establishments producing woolen cloths with a yearly output worth \$12,340,012.

There are one hundred and twenty-two cotton goods factories whose annual product is worth \$15,723,654.

Thirty-six establishments manufacture worsted cloths with a yearly output worth \$26,900,000.

One hundred and fifty hosiery and knit goods mills produce annually goods worth \$15,000,000.

Twenty-eight factories manufacture silk valued at \$4,531,794 annually.

Thirty-seven establishments produce millinery worth \$2,500,000 annually.

Eighty-four factories make men's hats, caps and materials valued at \$13,000,000 annually.

Three hundred and ninety-seven establishments produce men's clothing at an annual value of upwards of \$20,000,000.

Four hundred and fifty machine shops and other iron working establishments have an annual output of \$75,000,000.

There are more than one thousand houses in the city engaged in the wholesale trade.

Sixty-six shirt factories produce goods valued at \$6,000,000 annually.

Three of the leading railroad systems in the United States have their terminal and main offices in Philadelphia, namely, The Pennsylvania Railroad, Baltimore & Ohio Railroad and the Philadelphia & Reading Railway.

Philadelphia has thirty miles of available river front, lying between two great rivers, with thirty postal and trans-Atlantic steamship lines.

Philadelphia, with one-sixtieth of the population of the United States, furnishes one-twentieth of its manufactures.

Philadelphia's output in manufactures is equal to the total product of the State of New Jersey, and twice that of California.

Philadelphia's manufactories include 16,000 separate establishments, representing a capital investment of \$500,000,000.

These establishments employ 250,000 wage-earners, receiving annually \$115,847,076 in wages.

Philadelphia factories consume annually raw materials valued at \$400,000,000.

The value of the total annual output is \$703,466,526.

Philadelphia, for seventy-one years, has been the home of the largest saw works in the world.

As to locomotives, the fame of the Baldwin Locomotive Works, with an army of more than 19,000 skilled workmen, is international. Its immense Philadelphia plant, located on Broad Street between Spring Garden Street and Pennsylvania Avenue and extending west to Sixteenth Street—the very heart of the city—is one of the greatest attractions to all visitors. In past years it has been inspected by representatives of every nation on the globe. At the present time the capacity of the great works is nearly 3,000 locomotives annually, or about ten daily.

In drugs and chemicals, the name of Philadelphia is world-famed and the total volume of business conducted by the great wholesale drug houses of the city is second to no other city in the country. Some of the greatest authorities on drug manufacture are Philadelphians, who have spent more than half a century in the business, setting up a high standard for others to emulate. In this connection, it is proper to state that to Philadelphia belongs the credit of establishing the first pharmaceutical college in the country, its purpose being to educate young men in the scientific handling and compounding of drugs and medicines.

Philadelphia has probably the best printed and best edited newspapers published in the country. There are five morning newspapers and three evening papers. In these newspapers are to be found day after day the announcements of many advertisers that have appeared in their columns for thirty years or more.

☐ The circulation statement of the Philadelphia Daily and Sunday Record on which the above rating is based, showing the average net circulation per issue for the six months ending Sept. 30, 1914, is hereby guaranteed by the Charles E. Fuller Co. in the sum of \$100, which will be paid to the first advertiser using the Record who successfully controverts its accuracy. The advertiser is guaranteed permission to have a competent, certified public accountant audit the circulation books and records.

The average circulation of the Philadelphia Record for the six months ending December 31, 1914, was 177,633 for the daily and 141,329 for the Sunday.

HOUSTON—"THE WORKSHOP OF TEXAS"

Where Seventeen Railroads Meet the Sea

POPULATION 135,000, INCLUDING SUBURBS

FINANCE—13 Banks and Trust Companies.

Capital—\$10,500,000. Surplus—\$5,150,031. Deposits—\$42,849,401.

HOUSTON'S Six National Banks continue to lead the state in the matter of individual deposits, which is a *true index of the City's prosperity*.

WHOLESALE TRADE—1913, \$113,776,000; 1914, \$118,500,000.

HOUSTON serves an enormous trade territory for practically all lines. From the Red river on the north to the Mexican border on the south; from the Sabine river on the east to the Great Plains of the west. The Houston Wholesalers and Jobbers have also established markets in Louisiana, Oklahoma, Mexico, New Mexico and Arizona. Ocean freight rates is the key to the situation.

MANUFACTURING CENTER—Annual value of output \$51,350,000.

At the beginning of the present year Houston had 347 factories, employing approximately 10,000 factory workers with a combined pay-roll of \$10,500,000. Cost of raw material is estimated at \$28,500,000. More factory wage-earners than any other city in Texas.

PROPERTY VALUES—City, \$108,000,000; County, \$134,500,000.

That investments in both City and County realty have been *profitable* is shown by the four-fold increase in value which has taken place since 1897. The records of the County Tax Assessor show as follows:

City—1897	\$ 22,000,000	County.....	\$ 30,000,000
City—1914	108,000,000	County.....	134,500,000
Increase	\$ 86,000,000		\$104,500,000

RETAIL TRADE—Number of firms engaged, 2,360; annual volume, \$56,856,000.

HOUSTON is the shopping center for all South Texas. Seventeen steam railroads and the Interurban line enter Houston, affording ample transportation facilities and places Houston stores, with their superior offerings, in reach of a large and wealthy purchasing territory.

SHIP CHANNEL TRAFFIC—1,825,000 tons. Value, \$47,668,400.

The increase in value over the year preceding was \$6,210,000. The Channel is the main artery for the transportation of *material for which there is an ever-increasing demand*.

CENTER OF LUMBER INDUSTRY—Annual sales, \$42,000,000.

EIGHTY-ONE firms and corporations maintain headquarters in Houston, representing an investment of over \$60,000,000.

RAILROAD CENTER OF THE SOUTHWEST. Seventeen distinct steam rail lines.

The lines entering Houston operate 38,914 passenger trains annually, or an average of 106 every day. Number of employees, 6,000; annual pay-roll, \$5,762,500, all of which is distributed in Houston, to the general benefit of the city. Annual tonnage in and out-bound, 3,781,026. Value of property in Harris County, \$20,000,000.

CENTER OF THE TEXAS OIL INDUSTRY—The aggregate capital is \$70,000,000.

Petroleum plays an important part in the commercial and development history of Houston. The production of oil in Texas in 1913 aggregated 15,544,000 barrels, and Houston's position in connection with the distribution of this valuable product is strategic.

RICE CENTER—Production, 1913, 10,640,000 bushels.

HOUSTON is the principal rice milling center of the State. Value of product milled last year \$4,500,000. Number of bags of rough rice milled was 900,000. The five rice mills in pay-rolls distributed over \$200,000 in wages during the season.

COTTON—Average receipts, 2,500,000 bales net.

Last season Texas produced 3,908,166 bales of cotton, of which Houston handled 8,000,000 bales, which shows that the bulk of the crop was handled through Houston. The receipts for the past season were the largest on record and we maintain the distinction of being the Largest Inland Port Cotton Market in the World.

†The Times is the Seattle advertiser's Klondike. Seattle is one of the few towns where one paper alone will successfully cover the field. There are 56,000 families in Seattle. The Times distributes more than this number of copies in the city limits, or more than one copy to each family. For 1914 The Times averaged 72,000 copies daily and 89,000 copies Sunday. During the year 1914 this paper carried the enormous total of 10,847,424 lines of paid advertising, beating our 1913 figures by 83,169 lines and leading our nearest competitor by 3,886,602 lines. The best is the cheapest and is most used by men who know. For further information address The S. C. Beckwith Special Agency, New York, Chicago, St. Louis.

TACOMA,

according to the United States postoffice and Polk's directory figures, has a population of 110,418.

It covers an area of 42.63 square miles.

Its bank deposits last year were \$20,761,386.53.

It has 102 miles of paved streets and 300 miles of graded streets.

There are 508 factories operating in the city, employing 12,987 men. Monthly payroll is \$897,600.00.

Value of the output for 1914 approximately \$68,239,000.00.

Water exports during 1913—\$22,808,810.00.

Water imports during 1913—\$22,047,478.00.

The grain warehouse capacity is 5,182,000 bushels, this capacity being tested by an overflow at the present time.

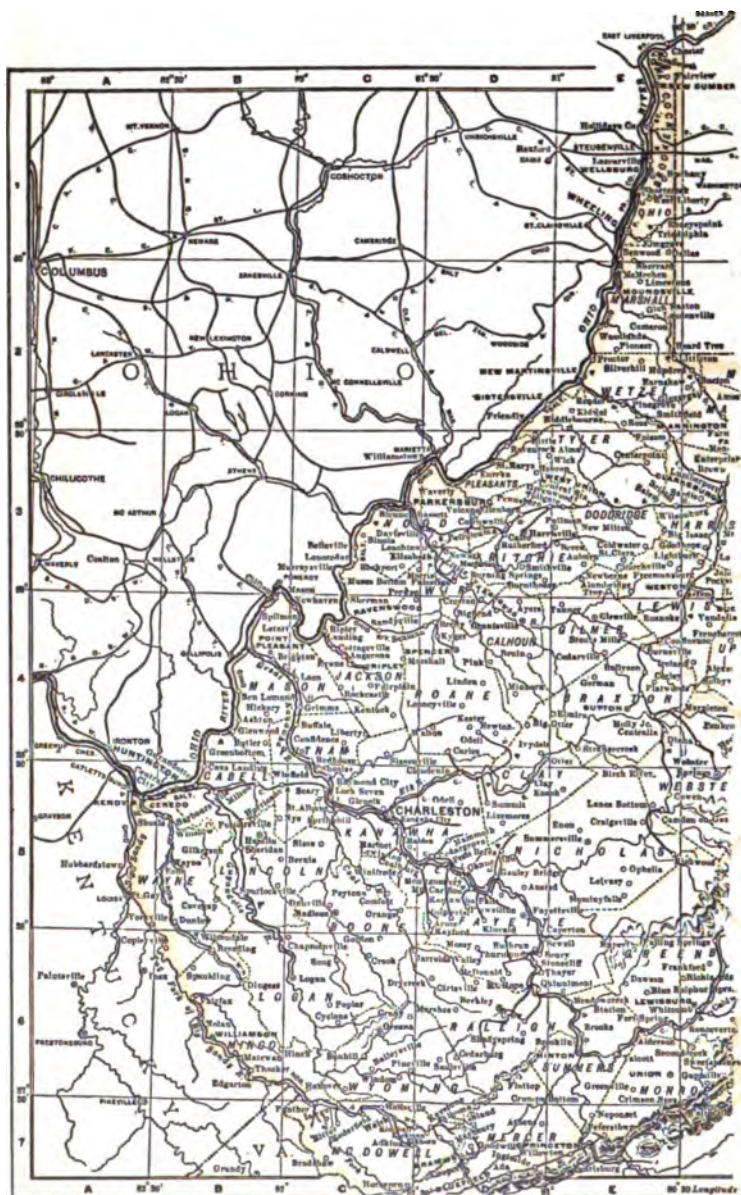

The territory covered by Tacoma and known as Tacoma trading territory is all that territory from a line 10 miles south of Seattle, east to the Cascade Mountains and south to the Oregon line.

The newspapers of Tacoma are The Tacoma Daily Ledger, published every morning, including Sunday, and holding the Associated Press franchise, and The Tacoma Daily News, published every afternoon except Sunday, holding the Associated Press franchise.

The A. B. C. statement gives The Ledger 20,488 circulation and The News 20,951. These papers are paying for this advertising.

† The Toronto Morning World is the Toronto morning paper with the big Toronto and suburban circulation. While the bulk of the circulation is Toronto and suburban, almost the entire circulation is concentrated within the sixty mile belt. Concentration in the richest section of the wealthy Province of Ontario means richer and more prolific returns for the advertiser.

The Toronto Sunday World not only has a larger total circulation but a larger purely Toronto circulation than any other Toronto paper—morning, evening or weekly—with possibly one exception. Going into the homes late Saturday night, it is read on Sunday when every member of the household has plenty of time and inclination for reading.

Each paper goes to an almost entirely different lot of subscribers and there is less duplication than there would be with any other Toronto paper. When you use both editions, you get a combined total circulation of more than 162,000, and a combined purely Toronto circulation of more than 123,000.

§ Government statement—See page 5. * Gross circulation. © Net circulation. □ Can use matrices. † Publisher's paid announcement. These marks, key to rates and meaning of figures in third column are explained on pages 2 and 3. Sworn circulation statements in bold face type.
